Summary

Full Stack Developer skilled in Python, Django, Django REST Framework, React.js, and PostgreSQL, with experience building responsive web applications, REST APIs, and JWT authentication systems. Seeking an entry-level Full Stack Developer or Python Django Developer role.

Technical Skills

Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, React.js, Tailwind CSS
Backend: Django, Django REST Framework
Database: PostgreSQL, MySQL
Tools: Git, GitHub, Postman
Concepts: REST APIs, JWT Authentication, CRUD Operations

Experience

Full Stack Developer Intern Dec 2025 – Jan 2026

- Worked on web application development using frontend technologies and backend integration.
- Gained practical experience in database operations, debugging, and application development.
- Applied problem-solving skills while working on development tasks and project requirements.

Projects

E-Commerce Application GitHub | Live Demo

- Developed a full-stack E-Commerce web application using HTML, CSS, React.js, Django, Python, and PostgreSQL.
- Built RESTful APIs using Django REST Framework for product, user, cart, and order management.
- Implemented user authentication, product search, shopping cart, checkout, and order management features.
- Integrated a PostgreSQL database to efficiently manage products, users, orders, and inventory.
- Performed CRUD operations and optimized database queries for improved application performance.
- Designed a responsive and user-friendly interface compatible with desktop and mobile devices.

QueueLess – Smart Queue Management System GitHub | Live Demo

- Developed a full-stack queue management system using React.js, Tailwind CSS, Django REST Framework, and PostgreSQL.
- Implemented digital token generation, queue tracking, service management, and live queue status monitoring.
- Developed an admin dashboard for managing organizations, services, and queue tokens.
- Implemented JWT authentication and role-based access control for secure user and admin operations.
- Designed responsive user and admin interfaces for efficient queue management and improved user experience.

EcoSmart – Smart Waste Management System GitHub | Live Demo

- Built a full-stack Smart Waste Management application using React.js, Django, Django REST Framework, and PostgreSQL.
- Developed REST APIs for complaint management, waste management, user authentication, and administrative operations.
- Implemented JWT authentication and role-based access control for secure user authorization.
- Enabled users to submit complaints with images, location details, and status tracking.
- Created dashboards for managing users, complaints, waste collection, tasks, and system activities.

Awards & Certifications

- Auto Cluster India – Certificate in Full Stack Development (2-Month Internship).
- HackerRank – 5-Star in Python.

Education

Bachelor of Computer Applications (BCA) 2026
Karim City College, Jamshedpur
CGPA: 8.65/10
